

UEFA Return to Play Protocol (RTPP) – latest version available [here](#)

The RTPP sets out the framework of medical, sanitary and hygiene procedures together with the operational protocols that are to be applied when staging UEFA competition matches. It is imperative that all precautions set out in this document, as well as the standard hygiene best practices, are strictly adhered to by all parties taking part in and/or organising UEFA matches. Non-respect of such social norms could have serious consequences for the staging of international matches.

UEFA Minimum Health and Hygiene Requirements for the Return of Spectators (MHHR) – latest version available [here](#)

The MHHR set out the minimum requirements that national associations and clubs (match organisers) must implement when staging UEFA competition matches with spectators in attendance. The Minimum Requirements are intended for use in conjunction with the latest UEFA Return to Play Protocol (RTPP).

For each stadium used to stage UEFA competition matches, the stadium hygiene officer and stadium manager must submit a MHHR Form (Declaration of Compliance). Once a fixture has been confirmed, the form will be available on TIME; it must be completed and submitted to the UEFA administration ahead of the first match in that stadium latest by MD-2.

If a team has already played in a stadium with or without spectators and has submitted the form, but the national and/or local applicable law changes in the meantime, a new form must be submitted before the next match.

COVID-19 Stadium Zoning Map

Clubs must share with the UEFA administration a COVID-19 Stadium Zoning Map for each stadium they plan to use during the 2021/22 season, unless a map has already been submitted and approved and has not changed since. The latest approved COVID-19 Stadium Zoning Map will appear in the TIME Stadium Passport (safety section) for reference.

COVID-19 Stadium Zoning Maps must be sent to Covid19ZoningMap@uefa.ch as PDFs, in accordance with the guidelines below, at least three weeks before the first match at the stadium in question.

Files should be named as follows: "*Stadium Zoning Map_Country Code_City_Stadium Name*".

If multiple maps exist for the same stadium (e.g. one for matches with spectators and another for matches without), please provide all maps in one file with multiple pages, specifying which map applies to which scenario.

Guidelines on producing COVID-19 Stadium Zoning Maps

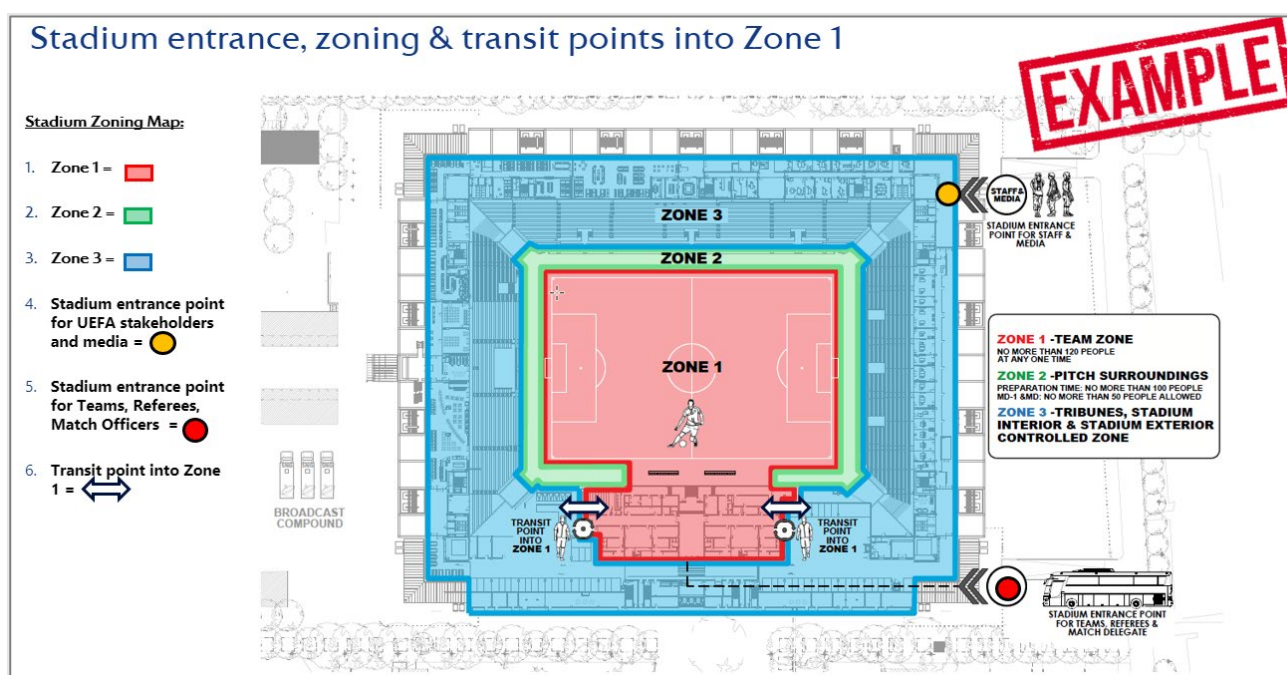

Maps must indicate the three zones defined in the Return to Play Protocol (RTPP):

- Zone 1 Team zone
- Zone 2 Pitch surroundings
- Zone 3 Tribunes, stadium interior & stadium exterior controlled zone

In relation to Zone 1, clubs are also asked to indicate the following on their maps:

- Stadium entrance point for teams, referees and match officers
- Stadium entrance point for UEFA stakeholders, suppliers and media
- Transit points into Zone 1

The examples below are provided for reference.

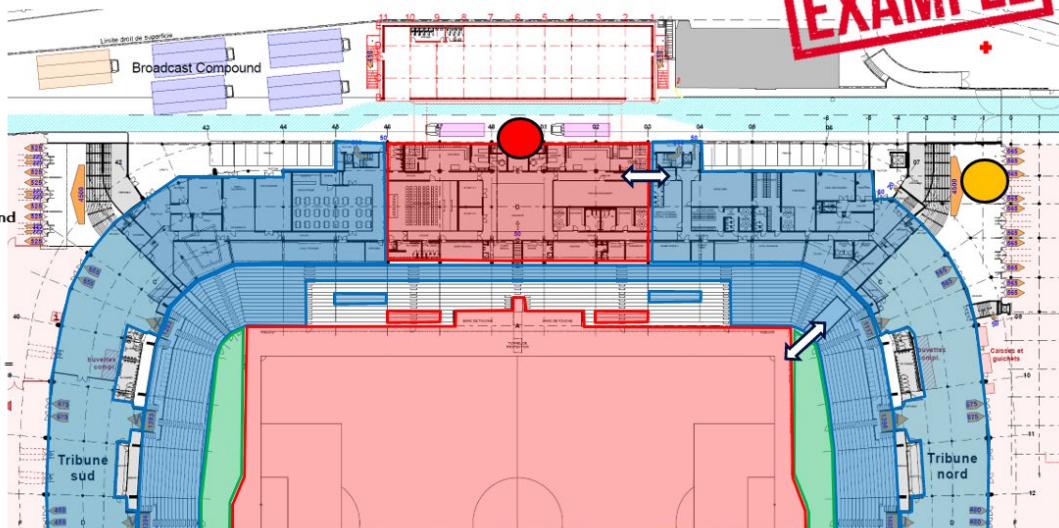

Enclosure 6

Stadium entrance, zoning & transit points into Zone 1

Stadium Zoning Map:

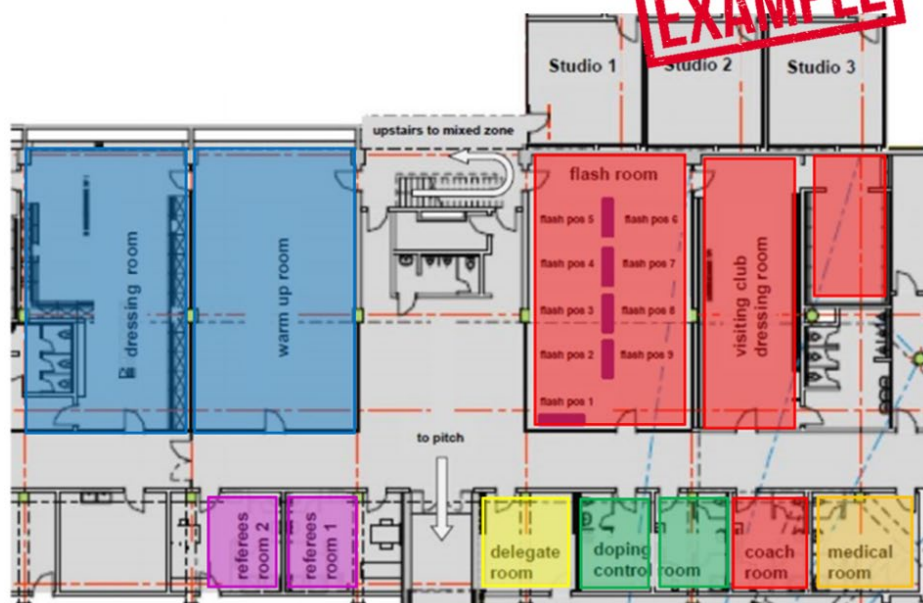

1. Zone 1 = ■
2. Zone 2 = ■
3. Zone 3 = ■
4. Stadium entrance point for UEFA stakeholders and media = ●
5. Stadium entrance point for Teams, Referees, Match Officers = ●
6. Transit point into Zone 1 = ↔

Indoor technical area map – Zone 1

Zone 1 – Team Zone:

1. Home team dressing room + additional room for technical staff
2. Away team dressing room + additional room for technical staff
3. Referees dressing room
4. Medical room
5. Doping control station + additional doping control waiting room
6. Delegate's room (VD to be accommodated as of team arrivals)

Please provide just one file per stadium including maps and accompanying explanations about how Zone 1 will be managed (i.e. staggered arrivals/departures, measures to avoid people's flows crossing, etc.).
