- 4.02 In the context of these regulations, any phrase introduced by the terms "including", "include", "in particular", "for example" or any similar expression is illustrative and does not limit the sense of the words preceding those terms.

## Article 5 Guiding principles

- 5.01 No item falling under the scope of these regulations may offend common decency or transmit political, religious or racial messages.
- 5.02 Commercial messages are allowed only in the form of sponsor advertising as set out in these regulations.

- 5.03 For each individual match, the referee has the final decision on the playing attire to be worn by each team's outfield players and goalkeepers, as stipulated in the *Laws of the Game*.
- 5.04 If a team's outfield players and/or goalkeepers do not bring an approved playing attire to a match, the UEFA administration may order them to wear a neutral or alternative playing attire provided or approved by the UEFA administration.

---

## Article 6 Equipment approval procedure

---

- 6.01 Each team is responsible for:
  - a. submitting all equipment that falls within the scope of these regulations to the UEFA administration for approval in accordance with these and the relevant competition regulations;
  - b. sending, upon request, samples of specific equipment items to the UEFA administration at any time, free of charge, for examination;
  - c. the proper implementation of these regulations by its players, staff and officials.
- 6.02 A team or manufacturer may submit equipment to the UEFA administration for a preliminary examination at any time, but this in no way releases the team from its obligations to comply with the standard approval procedure.
- 6.03 Each team must submit, free of charge and by the deadline stipulated in the relevant competition regulations, a complete sample set of the following equipment items to the UEFA administration for approval:
  - a. first-choice outfield player attire;
  - b. second-choice outfield player attire;
  - c. first-choice goalkeeper attire;
  - d. second-choice goalkeeper attire;

- 6.04 Approved equipment may be used in UEFA competitions other than the one for which it was approved, subject to the relevant competition regulations and the explicit authorisation of the UEFA administration. To obtain authorisation, a written request must be submitted to the UEFA administration, declaring the equipment to be identical to that which has already been approved. New samples do not need to be submitted.
- 6.05 If any approved equipment item is subsequently altered in any way, it must be resubmitted to the UEFA administration for approval prior to use.

- 
- 6.06 The UEFA administration's decisions are communicated and explained to the respective teams in writing. For club teams, such decisions are valid for the duration of the competition, competition phase or season specified. For representative teams, such decisions are valid for the period of use of the equipment in question.
  - 6.07 The UEFA administration may consider written or oral submissions made by the teams in the equipment approval procedure.
  - 6.08 All decisions taken by the UEFA administration in the equipment approval procedure are final.

## II Base colours and elements of playing attire

---

### Article 7 Shirt structure

The number zone is based on a two-digit number, and must extend 2cm above the highest point and 3cm below the lowest point of the two digits, and horizontally 3cm from the left edge of the left-hand digit and 3cm from the right edge of the right-hand digit. The number zone must be free of any team, manufacturer or other identification or advertising.
  - c. Sleeve free zone:
    - i. In UEFA representative team competitions, this area on each sleeve is reserved exclusively for the badges described in [Chapter IX](#). The sleeve free zones must be free of any team, manufacturer or other identification or advertising.
    - ii. In UEFA club competitions, this area on the right sleeve is reserved exclusively for the badges described in [Chapter IX](#), and this area on the left sleeve is reserved for sponsor advertising or a charity logo. The sleeve free zones must be free of any team, manufacturer or other identification or advertising except those expressly permitted.

---

### Article 8 Colours and patterns

---

- 8.01 If a playing attire item comprises three or more colours, one must be clearly dominant on the surface of that item. For hooped, banded, striped or checked items (i.e. with two dominant colours), any use of a third colour must not dominate or affect the distinctiveness of the shirt or socks.
- 8.02 The dominant colour (or colours in the case of hooped, banded, striped or checked items) must be equally visible on the back and front of each item of playing attire, excluding the number zone on the back of shirts (see [Paragraph 7.01\(b\)](#)).
- 8.03 The colours used to create a hooped, banded, striped or checked shirt on the front must both be clearly visible on the back of the playing attire if the same pattern (e.g. stripes) is not used on the back of the playing shirt.

**8.04** No material used in the construction of playing attire may be reflective or change its colour or appearance under any external influence (pressure, light, water, etc.). This includes material used for numbers, player names, sponsors or charity logos.

**8.05** Both the sleeves on shirts must be identical in colour and appearance (e.g. pattern or design), except in the case of hooped, banded, striped and checked shirts, on which each sleeve may be one of the two main colours.

**8.06** Shirts that comprise small horizontal or vertical lines that cover the whole length or breadth of the shirt, do not exceed 2mm in width (pin stripes) and are spaced at least 5cm apart do not constitute striped shirts.

**8.07** Colours and their contrast are measured in accordance with [Article 54](#) to ensure compliance with the above provisions.

- 
- 8.08 Any clothing or accessories that may be worn under, over or in addition to playing attire and may be visible on the field of play is considered special equipment worn on the field of play, for which specific rules are set out in [Chapter X](#).
- 8.09 The choice of pattern is unrestricted with the following exceptions (to be assessed at the sole discretion of the UEFA administration):
- a. the pattern must be non-pictorial, e.g. it must not contain any images, illustrations or any other symbols (any pattern that does not satisfy this requirement will be considered as a decorative element);
  - b. the pattern must not allow a reasonable person to identify a manufacturer or sponsor relevant to the equipment (any pattern that does not satisfy this requirement will be considered a trademark).

---

## Article 9 Colour choices and combinations

---

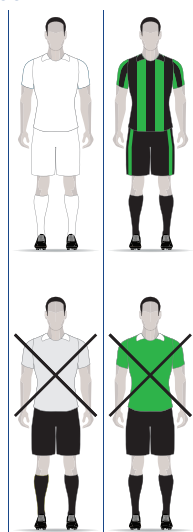

- 9.01 In order to minimise colour clashes, there must be a clear contrast between each team's first-choice and second-choice outfield player attires, to the extent that they could be worn by opposing teams in a match.
- 9.02 If one playing attire comprises predominantly dark colours, the other must comprise predominantly light colours, or if one of the playing attires is hooped, banded, striped or checked, the other must not contain either of the colours of the hoops/bands/stripes/checks.
- 9.03 Teams must have at least two goalkeeper attires which clearly contrast with each other and with the first-choice and second-choice outfield player attires.
- 9.04 A team may be requested to combine items from more than one of its approved outfield player and/or goalkeeper attires (shirt, shorts or socks), in order to create a visible contrast with the other team.

## FIRST-CHOICE OUTFIELD PLAYER ATTIRE

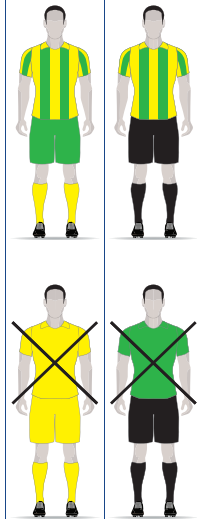

## SECOND-CHOICE OUTFIELD PLAYER ATTIRE

### OUTFIELD PLAYER ATTIRE

### GOALKEEPER ATTIRES

### FIRST-CHOICE GOALKEEPER ATTIRES

### SECOND-CHOICE GOALKEEPER ATTIRES

**9.05** The order of priority for the selection of colours for a match is as follows:

- a. home team outfield player attire;
- b. away team outfield player attire;
- c. home team goalkeeper attire;
- d. away team goalkeeper attire;
- e. referee team attire.

However if there is a clash for one of the above participants that cannot be resolved (i.e. none of the approved attires offer the required level of colour contrast) then other participants may have to change (in reverse order) until a suitable contrast can be found.

**9.06** If the referee decides on the spot that the two teams' selected colours could lead to confusion, the home team must change playing attire, for practical reasons.

**9.07** For a final, both teams should wear their first-choice outfield player attire. If this would create a colour clash, the designated away team must wear its second-choice (or other approved alternative) outfield player attire. If that too would create a colour clash, the UEFA administration decides on the playing attire to be worn by each team in consultation with the referee.

---

## Article 10 Numbers

---

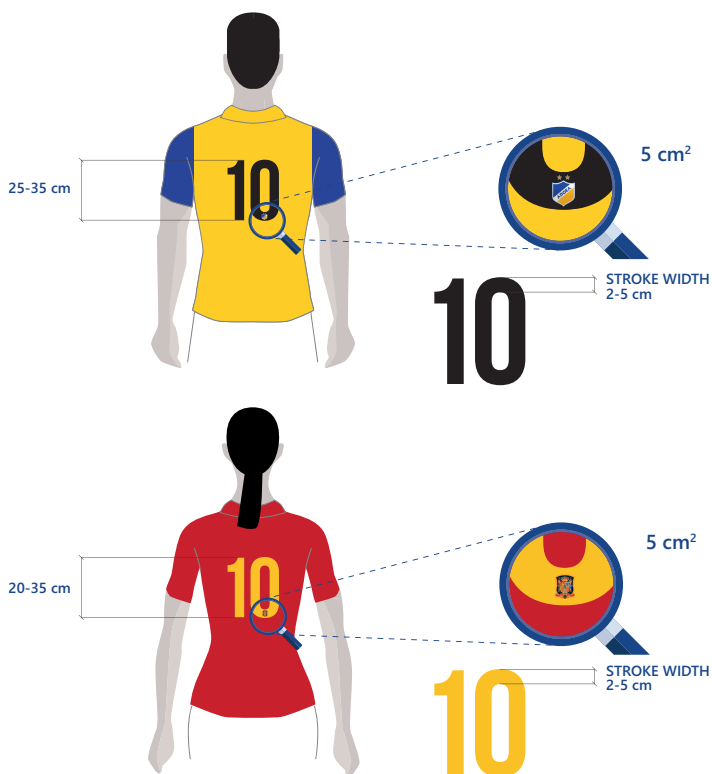

**10.01** A number must be centred on the back of each shirt. Only whole numbers may be used, no number higher than 99 may be used and the number 1 may only be used by a goalkeeper.

**10.02** Numbers must be of a single colour that contrasts with the number zone in accordance with [Article 54](#).

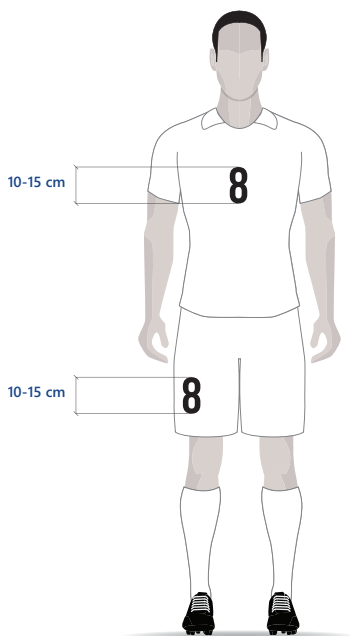

**10.03** Numbers must be clearly legible. The stroke width of each digit must be 2–5cm and the digits themselves must be:

- b. 20–35cm high on women's shirts.

- 10.04 Numbers must be clearly legible to the referee team, commentators, spectators and TV viewers, in daylight and under floodlights, from at least 50m away.
- 10.05 Numbers must also appear on the front of shorts, on either leg and in any position. Short numbers must be between 10cm and 15cm high, be clearly legible and clearly contrast with the colour of the shorts.
- 10.06 Numbers may contain a team emblem (or part thereof) of no more than 5cm<sup>2</sup> in the bottom of each digit.
- 10.07 Numbers must be free of manufacturer identification, sponsor advertising and decorative elements.
- 10.08 Numbers may contain breathing holes or lines up to 2mm wide and they may be divided into up to four parts, provided the divisions do not exceed 2mm.
- 10.09 For the sake of legibility, digits may be surrounded by a shadow outline, 3D effect or contrasting key line of a decorative colour. Key lines may be around the outside of the number or just inside. Shadow outlines, 3D effects or contrasting key lines are however not taken into account when measuring number height.

- 10.10** Numbers may also be placed on the front of shirts for representative team competitions, and they may be mandatory under certain competition regulations. Numbers on the front of shirts must be between 10cm and 15cm high, be clearly legible and clearly contrast with the colour(s) of the shirt.

---

## Article 11 Player shirt names

---

- 11.01** Players may be identified on their shirts by means of their surname and/or first name, or a UEFA-approved nickname.
- 11.02** The name by which a player is identified on their shirt must correspond with the name entered on the player list.

- 11.05** Names must be free of manufacturer identification, sponsor advertising and decorative elements.
- 11.06** Each letter must be no more than 7.5cm high.

- 11.07** For the sake of legibility, letters may be surrounded by a shadow outline, 3D effect or contrasting key line of a decorative colour. Key lines may be around the outside of the letter or just inside. Shadow outlines, 3D effects or contrasting key lines are however not taken into account when measuring letter height.
- 11.08** The letters must clearly contrast with the background colour(s) of the shirt.

---

## Article 12 Decorative elements

---

- 12.01** Decorative elements appearing on playing attire must:
- a. not include a number or letter, or any combination of numbers and/or letters;
  - b. not amount to, give the impression of being, or attempt to fulfil any of the functions of being (in the UEFA administration's sole discretion) a trademark;
  - c. not compromise the distinctiveness of the playing attire or its colours or the legibility of the player numbers or names;
  - d. be incorporated using one of the following techniques:
    - i. jacquard weave;
    - ii. tonal print;
    - iii. embossing;
    - iv. any other technique approved in writing by the UEFA administration;
  - e. adhere to the colour contrast requirements as stipulated in [Article 54](#).
- 12.02** Provided that the above requirements are adhered to, decorative elements that appear within the manufacturer's generic product line are permitted to be used on playing attire.

## XVI Measurement procedures

---

### Article 53 Measurement of identifications and representations

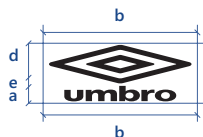

---

- 53.01** All items incorporated into equipment are measured in the smallest possible geometric form (square, rectangle, triangle, circle etc.) and their dimensions calculated using the usual mathematical formula.
- 53.02** To calculate the surface area, the widest part of the item is measured from edge to edge. Exceptionally, items may be divided into several individual geometric forms for the purpose of calculating the surface area.
- 53.03** Manufacturers may submit specific proposals as to how to measure specific items submitted to the UEFA administration.
- 53.04** Manufacturer design marks and product line identifications are measured as individual geometric forms when the distance between the various elements does not exceed 0.5cm.
- 53.05** Player numbers and names are measured without including any shadow outlines, 3D effects or contrasting key lines.
- 53.06** One of the following surface areas, whichever is the larger, is used for measuring sponsor advertising:
- a. The surface of a single-coloured patch used for sponsor advertising if the patch is not the same colour as the underlying shirt colour.
  - b. The surface of the sponsor advertising used if the advertising is printed directly on the shirt, or on a patch of the same colour as the underlying shirt colour (if two main shirt colours are used, patches used for sponsor advertising may be either of the two shirt colours and only the sponsor advertising itself will be measured for approval). This is measured as several individual geometric forms when made up of more than one separable line of text or consisting of a logo and text separately, however the distance between the various elements must not exceed 5cm.
- 53.07** Team and manufacturer identifications are measured including any surrounding geometric form.
- 53.08** On shirts with chest rings (as a minimum from seam to seam across the front of the shirt), the surface of the sponsor advertising is measured and not the chest ring.
- 53.09** The following diagrams and related descriptions provide examples of the measurement procedure:
- a. Manufacturer design mark
    - i. The Nike logo size is calculated using the formula: "a" x "b"
    - ii. The Puma logo size is calculated using the formula: ("c" + "d")/2 x "h"

b. Manufacturer composite mark

- i. The total size is calculated by adding the size of the two separate areas measured as follows:
  - The word mark size which is calculated using the formula: "a" x "b"
  - The design mark size which is calculated using the formula: "b" x "d"
- i. The distance between the design mark and the word mark in a composite mark may not exceed 0.5cm (otherwise they will be considered as two separate identifications)

c. Sponsor advertising on a neutral coloured patch

- i. The sponsor advertising size is calculated using the formula of the neutral patch: "a" x "b"

d. Sponsor advertising applied on the shirt colours or on a patch of one of the shirt colours

- i. The size of a single item of sponsor advertising is calculated using the formula: "a" x "b"

- ii. The size of sponsor advertising containing more than one item is measured by adding together the size of the two separate areas, measured as follows:
  - Two words calculated as ("a" x "b") + ("c" x "d")
  - Word and logo calculated as ("a" x "b") + (area of the circle "c")
  - The distance ("d") between the word and the logo may not exceed 5cm

## Article 54 Measurement of colour contrast

- 54.01** The UEFA administration measures the contrast of colours used on playing attire using a spectrophotometer to provide an objective means of decision-making.
- 54.02** Measurements are taken using a spherical spectrophotometer with an aperture of 6.6mm and a measurement area of 4mm on a white-point of D65 and a Standard Observers Angle of 10°. A spectrally neutral 18% Reflectance Grey Card is placed under the single layer of fabric to be measured, and each final measurement is calculated from the average of three readings, at 0°, 90° and 45°.
- 54.03** The contrast between shirt colours in the number zone must be less than or equal to a Delta L of 25. Colour combinations with a Delta L difference value greater than 25 require a single-colour patch on the back of the shirt to serve as the number zone.
- 54.04** Player numbers must contrast with the background colour(s) in the number zone by a Delta L value equal to or higher than 30.
- 54.05** Tonal prints must be included in a tonal variation of the (background) colour(s) of the item of playing attire into which they are incorporated, with a contrast that is less than or equal to a Delta L value of 10. Background colours are measured before the associated tonal print.
- 54.06** Jacquard weave thread must be included in a thread that must be the same colour as the fabric into which it is woven. The jacquard weave must not dominate, contain a colour that contrasts with, or otherwise affect the distinctiveness of the item of playing attire into which it is incorporated. When measured, the contrast between the two weaves must be less than or equal to a Delta L value of 5. Background colours are measured before the associated jacquard weave thread.
