# Checklist for Therapeutic Use Exemption (TUE) Application: Intravenous Infusions

**Prohibited Method: Volume > 100 ml per 12 h**

This Checklist is to guide the athlete and their physician on the requirements for a TUE application that will allow the TUE Committee to assess whether the relevant International Standard for TUE criteria are met.

Please note that the completed TUE application form alone is not sufficient; supporting documents MUST be provided. A completed application and checklist do NOT guarantee the granting of a TUE. Conversely, in some situations a legitimate application may not include every element on the checklist.

## TUE Application form must include:

- All sections completed legibly
- All information submitted in English, French or German
- A signature from the applying physician
- The Athlete’s signature

## Medical report should include details of:

- Medical history: symptoms at manifestation, course of illness/condition, start of treatment. Must define/describe where the infusion was/is to be administered. *(Note: infusions given as part of hospital treatment, surgical procedure or diagnostic procedure do not require a TUE unless they contain a prohibited substance).*
- Findings on examination: e.g., physical signs of illness or relevant medical condition
- Interpretation of symptoms, clinical findings and test results
- Diagnosis of illness or most probable medical condition
- Infusion: volume and time period over which it has been given (only >100ml per 12h require a TUE) and substance (if any prohibited substance is infused) including dosage and frequency
- Response to treatment/course of illness/condition
- If an alternative treatment was not an option, a description of why iv administration of fluid or substance was/is chosen must be given

## Diagnostic test results included (copies of originals or printouts)

- Laboratory tests: if available, e.g. Hb/Hct, electrolytes, blood cell count, serum ferritin etc.

## Additional information included
